**ENGLISH ONLY**

**INTERGOVERNMENTAL NEGOTIATING COMMITTEE  
FOR A FRAMEWORK CONVENTION ON CLIMATE CHANGE  
Sixth session  
Geneva, 7-10 December 1992**

**INFORMATION ON DOCUMENTATION DATABASES**

Prepared by the Climate Change Secretariat (INC/FCCC) and  
the Information Unit on Climate Change (UNEP/WMO/IUCC)

**A/AC.237/Misc.24**

**GE.92-63336**

The Climate Change Secretariat would like to inform the participants in the sixth session of INC/FCCC of its efforts to build up a reference unit on climate change. This effort is being developed in close collaboration with the UNEP/WMO Information Unit on Climate Change (IUCC).

As a first step, bibliographical and periodicals databases have been developed using the CDS/ISIS software, which is broadly used within the UN system and is available free of charge from UNESCO.

The bibliographical database, called CLIMA, includes books, articles, reference material, "grey literature" and UN documents and reports available at the Climate Change Secretariat as well as at IUCC.

The periodicals database, called CCPER, includes journals, bulletins, newsletters and serial publications available at both organizations and cited in other databases.

For your information, listings of titles available in CLIMA and CCPER as at 30 November 1992 are attached.

Data available in CLIMA include inter alia

- titles in English and other languages
- meetings data, i.e. title, place, dates
- author(s)
- corporate author(s)
- ISBN
- publisher(s) with address
- if an article, where it was found
- document code, if applicable
- subject descriptors, e.g. energy policy, forestry, agriculture, research etc...

Data available in CCPER include inter alia

- titles in English and other languages
- ISSN
- publisher with address
- basis of receipt, i.e. free or not free
- subject descriptors

In order to expand the contents of both these databases and to be able to inform you of material available in the field of climate change we need your help and would appreciate receiving any relevant published or non-published information.

At this point in time the databases are still being developed and need refinement. If human and financial resources permit we hope soon to be in a better position to answer your request for information, and we look forward to developing other components of our information system. The data contained in the databases will be available in the future upon request either on hard copy or on diskette.

The inclusion of a publication in this listing does not reflect any endorsement of that publication by the United Nations or any of its specialized agencies. Readers are welcome to reprint the contents of the listing for further distribution if the source of information is cited.

Please contact Carmen Schlosser, Climate Change Secretariat, 16, Avenue Jean Trembley, 1209 Geneva for further information on CLIMA and Michael Williams, UNEP/WMO IUCC, Palais des Nations, CH-1211 Geneva 10, Switzerland, for further information on CCPER.
