 - (b) that the third review of adequacy of Article 4.2(a) and (b), under Article 4.2 (d) of the Convention, shall be undertaken in 2001, on the basis of recommendation by the SBI, advice from the SBSTA as necessary, and the best scientific information available (including the Third Assessment Report of the IPCC), as well as other relevant technical, social and economic information;
 - (c) that further reviews of adequacy of the Convention under Article 4.2 (d) shall be conducted in conjunction with reviews of progress towards achievement of the objective of the Convention under Article 7.2 (a) and (e) and review of the composition of Annexes I and II under Article 4.2 (f) of the Convention;

The Conference of the Parties,

4. *Decides* that further action is needed in response to the second review of the adequacy of Article 4.2(a) and (b), in meeting the objective of the Convention:
 - To make an assessment of the concentration levels at which greenhouse gases need ultimately to be stabilized in the atmosphere and the time frame over which this should be achieved to prevent dangerous anthropogenic interference with the climate system; and the implications for global emissions;
 - To examine the obligations of the Parties to the Convention, as required by Article 7.2 including assessment of the capacity of Parties to meet those obligations; the scope for the obligation of some or all Parties to be strengthened; including by the assumption of limitation or reduction targets; adoption of policies and measures and ways and means of assisting non-Annex I Parties through bilateral and multilateral channels in the fulfilment of such obligations;
5. *Decides*: [on the further review of adequacy of Article 4.2(a) and (b)] That a third review of the adequacy of Article 4.2(a) and (b) should be undertaken at COP/MOP 2, together with other relevant reviews including that under Article 7.2 as envisaged by Article 9 of the Kyoto Protocol, but in any case no later than 2002, when – on the basis of recommendations by SBI, drawing on advice by SBSTA, as necessary, as well as other relevant technical, social and economic information - the COP should decide on appropriate next steps.
