

9 November 1998

ENGLISH ONLY

UNITED NATIONS FRAMEWORK CONVENTION ON CLIMATE CHANGE

CONFERENCE OF THE PARTIES*

Fourth session

Buenos Aires, 2-13 November 1998

Agenda item 5 (a) (v)

MATTERS RELATED TO THE KYOTO PROTOCOL

MATTERS RELATED TO DECISION 1/CP.3, PARAGRAPH 5

**IMPACTS OF SINGLE PROJECTS ON EMISSIONS
IN THE COMMITMENT PERIOD**

Submissions by Parties

Note by the secretariat

Addendum

1. In addition to the submission included in document FCCC/CP/1998/MISC.11, one further submission has been received from a Party in connection with item 5 (a) (v) of the agenda of the Conference of the Parties.
2. In accordance with the procedure for miscellaneous documents, the submission received is attached and reproduced in the language in which it was received and without formal editing.

* Including the ninth sessions of the Subsidiary Body for Scientific and Technological Advice and the Subsidiary Body for Implementation.

FCCC/CP/1998/MISC.11/Add.1

EZE.98-

SUBMISSION BY ICELAND

**MATTERS RELATED TO THE KYOTO PROTOCOL:
IMPACT OF SINGLE PROJECTS ON EMISSIONS
IN THE COMMITMENT PERIOD**

The Conference of the Parties,

Recalling its decision 1/CP.3, paragraph 5 (d), requesting the Conference of the Parties to consider and, as appropriate, take action on suitable methodologies to address the situation of Parties listed in Annex B to the Protocol for which single projects would have a significant proportional impact on emissions in the commitment period,

Recognising the importance of renewable energy in meeting the objectives of the Convention,

Decides that for the first commitment period industrial process emissions from a single project¹ which comes into operation after 1990 and adds in that period more than five per cent to the total greenhouse gas emissions in 1990 of a Party listed in Annex B to the Protocol, shall be reported separately and not included in national totals to the extent that they would cause the Party to exceed its assigned amount, provided that the total emissions of the Party were less than 0.05% of total Annex I emissions in 1990; renewable energy is used resulting in a reduction in greenhouse gas emissions per unit of production; and best environmental practice is used to minimize process emissions,

Requests Parties with projects which meet the requirements specified above to report this in a timely manner to the Secretariat in their national communications. Such information will be reviewed by the expert review teams according to decisions made by the Conference of the Parties relevant to reviews,

Requests the Secretariat to report to the Conference of the Parties serving as the meeting of the Parties to the Protocol on the process emissions from any projects meeting the requirements specified above as well as an estimate of the emission savings resulting from the use of renewable energy in these projects.

¹ A project at a single site operating in accordance with a single environmental operating licence.

Annex

WORKPLAN

COP decision on single projects	COP4
Methodological work on the estimation of emission savings and global benefit	SBSTA 12
Implications for guidelines for reporting by Parties to be developed under Article 7, paragraph 4, of the Protocol	COP/MOP1
Implications for guidelines for expert review teams to be developed under Article 8, paragraph 4, of the Protocol	COP/MOP1
Implications for procedures and mechanisms to determine and address cases of non-compliance	COP/MOP1
