I. DEVELOPMENT AND TRANSFER OF TECHNOLOGIES (DECISIONS 4/CP.4 AND 9/CP.5)

Draft decision -/CP.6

Development and transfer of technologies

The Conference of the Parties,

Recalling Chapter 34 of Agenda 21 and the relevant provisions of the Programme for the Further Implementation of Agenda 21 on the transfer of environmentally sound technologies adopted by the United Nations General Assembly at its nineteenth special session in 1997,¹

Pursuant to the relevant provisions of the Convention, in particular, its Article 4.1, 4.3, 4.5, 4.7, 4.8 and 4.9, and Articles 9.2 (c), 11.1, 11.5, 12.3 and 12.4,

Recalling its decisions 11/CP.1, 13/CP.1, 7/CP.2, 9/CP.3, 4/CP.4 and 9/CP.5 and the relevant provisions of its decision 1/CP.4 on the Buenos Aires Plan of Action,

1. *Decides* to adopt the framework for meaningful and effective actions to enhance the implementation of Article 4.5 of the Convention contained in the annex to this decision as part of the outcome of the technology transfer consultative process (decision 4/CP.4) and the Buenos Aires Plan of Action (decision 1/CP.4);
2. *Decides* to establish an intergovernmental consultative group of scientific and technical experts on technology transfer under the Subsidiary Body for Scientific and Technological Advice to address barriers to technology transfer, information needs and progress on technology transfer and to enhance the implementation of Article 4.5 of the Convention;
3. *Urges* developed country Parties to provide technical and financial assistance, as appropriate, through existing bilateral and multilateral cooperative programmes to support the efforts of the Parties in implementing the programmes and measures identified in the annexed framework and in enhancing the implementation of Article 4.5 of the Convention;
4. *Requests* the Global Environment Facility, as an operating entity of the financial mechanism of the Convention, to provide financial support for the implementation of the annexed framework through its climate change focal area, the special climate change fund and the adaptation fund;
5. *Requests* the Convention secretariat:
 - (a) To consult with relevant international organizations, and solicit information on their capabilities and abilities to support certain activities identified in the framework for

¹ A/RES/S-19/2.

meaningful and effective actions contained in the annex to this decision, and to report on its findings to the Subsidiary Body for Scientific and Technological Advice at its sixteenth session;

(b) To facilitate the implementation of the annexed framework in cooperation with the Parties, the Global Environment Facility and other relevant international organizations.

ANNEX

Development and transfer of technologies

Framework for meaningful and effective actions to enhance the implementation of Article 4, paragraph 5, of the Convention

Purpose

1. The purpose of this framework is to develop meaningful and effective actions to enhance the implementation of Article 4.5 of the Convention by increasing and improving the transfer of and access to environmentally sound technologies (ESTs) and know-how.

Overall approach

2. The successful development of ESTs and know-how requires a country-driven, integrated approach, at a national and sectoral level. This should involve cooperation among various stakeholders (the private sector, governments, the donor community, bilateral and multilateral institutions, non-governmental organizations and academic and research institutions), including activities on technology needs assessments, technology information, enabling environments, capacity-building and mechanisms for technology transfer.

3. The recommended themes and areas for meaningful and effective actions below are meant to cover all programmes and activities undertaken with a view to enhance the implementation of Article 4.5 of the Convention, encompassing both mitigation and adaptation technologies.

Key themes and areas for meaningful and effective actions

1. Technology needs and needs assessments

Definition

4. Technology needs and needs assessments are a set of country-driven activities that identify and determine the mitigation and adaptation technology priorities of developing country Parties and Parties included in Annex I but not included in Annex II. They involve different stakeholders in a consultative process to identify the barriers to technology transfer and measures to address these barriers through sectoral analyses. These activities may address soft and hard technologies, such as mitigation and adaptation technologies, identifying regulatory options, developing fiscal and financial incentives and capacity-building.

Purpose

5. The purpose of technology needs assessments is to assist Parties in identifying and analysing priority technology needs, which can be the basis for a portfolio of mitigation and adaptation projects and programmes.

Implementation

6. Developing country Parties and Parties included in Annex I but not included in Annex II are encouraged to undertake assessments of country-specific technology needs, subject to the provision of resources, as appropriate to country-specific circumstances, by developed country Parties and other developed Parties included in Annex II. Other organizations in a position to do so may also assist in facilitating the technology needs assessment process. Parties are encouraged to make available information on the results of their needs assessments in their national communications, and other related national reports and channels (e.g. technology information clearing house) for consideration by the Subsidiary Body for Scientific and Technological Advice (SBSTA) on a regular basis.
7. Developed country Parties and other developed Parties included in Annex II to the Convention are urged to facilitate and support the needs assessments process, recognizing the special circumstances of least developed countries.
8. The Chairman of the Subsidiary Body for Scientific and Technological Advice, with the assistance of the secretariat, is requested to organize a meeting with representatives from governments, experts drawn from the UNFCCC roster of experts, and representatives from relevant international organizations to identify methodologies needed to undertake technology needs assessments, and to report on its findings to the SBSTA at its sixteenth session.

2. Technology information

Definition

9. The technology information component of the framework defines the means, including hardware, software and networking, to facilitate the flow of information between the different stakeholders to enhance the development and transfer of ESTs. This technology information component of the framework could provide information on technical parameters, economic and environmental aspects of ESTs, and the identified technology needs of developing country Parties and Parties included in Annex I but not included in Annex II, as well as the availability of ESTs from developed countries and opportunities for technology transfer.

Purpose

10. The technology information component serves to establish an efficient information system in support of technology transfer and to improve the quality, generation, flow of, and access to, technical, economic, environmental and regulatory information relating to the development and transfer of ESTs under the Convention.

Implementation

11. The Convention secretariat is requested:
 - (a) To accelerate its work on the development of an international technology transfer inventory/information clearing house by coordinating with Parties, relevant United Nations

agencies, and other international organizations and institutions to develop options for further implementation of the clearing house and enhancement of existing technology information centres and networks. Reports on the options and recommendations should be provided to the SBSTA at its subsequent sessions;

(b) To seek to cooperate with the Climate Technology Initiative, *inter alia*, in the possible development of a new search engine to access existing databases of environmentally sound technologies, organize experts meetings on technology information, for example, on detailed user needs, identify gaps in existing EST inventories, update and develop inventories and facilitate sharing of experience on success stories related to technology transfer;

(c) To establish a network of technology information centres before the eighth session of the Conference of the Parties, taking into consideration the conclusion of the SBSTA on this matter.

3. Enabling environments

Definition

12. The enabling environments component of the framework focuses on the government actions, such as fair trade policies, removal of technical, legal and administrative barriers to technology transfer, sound economic policy, regulatory frameworks, and transparency that create an environment conducive to private and public sector technology transfer.

Purpose

13. The purpose of the enabling environments component of the framework is to improve the effectiveness of the transfer of mitigation and adaptation technologies by identifying and analysing ways to facilitate transfer of ESTs, including identification and removal of barriers at each stage of the process.

Implementation

14. The following are means of creating enabling environments for technology transfer:

(a) All Parties, particularly developed country Parties, are urged to improve, as appropriate, the enabling environment, for transfer of ESTs through identification and removal of barriers, including, *inter alia*, strengthening environmental regulatory frameworks, enhancing legal systems, ensuring fair trade policies, utilizing tax preferences, protecting intellectual property rights, and improving the access to publicly funded technologies, and other programmes to expand commercial and public technology transfer to developing countries;

(b) All Parties are urged to explore, as appropriate, opportunities to provide positive incentives, such as preferential government procurement, transparent and efficient approval procedures for technology transfer projects, and improvement of possible benchmarks, standards, and labelling, which support the development and diffusion of ESTs;

(c) All Parties are urged to promote joint research and development programmes, as appropriate, both bilaterally and multilaterally;

(d) Developed country Parties are encouraged to further promote and implement facilitative measures, for example, export credit programmes and tax preferences, and regulations, as appropriate, to promote transfer of ESTs;

(e) All Parties, particularly developed country Parties, are encouraged to integrate, as appropriate, the objective of technology transfer to developing countries into their national policies, including environmental and research and development policies and programmes;

(f) Developed country Parties are encouraged to promote, as appropriate, the transfer of publicly owned technologies.

4. Capacity-building

Definition

15. Within the context of enhancing the implementation of Article 4.5 of the Convention, capacity-building is a process that seeks to build, develop, strengthen, enhance and improve existing scientific and technical skills, capabilities and institutions in developing country Parties and Parties included in Annex I but not included in Annex II to assess, adapt, manage and develop ESTs.

16. Capacity-building must be country-driven, addressing specific needs and conditions of developing countries and reflecting their national sustainable development strategies, priorities and initiatives. It is primarily to be undertaken by and in developing countries in accordance with the provisions of the Convention.

Purpose

17. The purpose of capacity-building under this framework is to strengthen the capacities of developing country Parties and Parties included in Annex I but not included in Annex II to promote the widespread dissemination, application and development of environmentally sound technologies and know-how to enable them to implement the provisions of the Convention. Capacity-building under this framework should be guided by principles established in decision -/CP.6 on capacity-building.

Scope

18. The following is the initial list of needs for capacity-building of developing country Parties and Parties included in Annex I but not included in Annex II, for the transfer of, and access to, ESTs and know-how:

(a) Implementation of regional, subregional and/or national capacity-building activities related to the transfer and development of technologies;

- (b) Enhancing the awareness of financial institutions, public, private and international, of the need to evaluate ESTs on an equal footing with other technology options;
- (c) Training on the use of ESTs through demonstration projects;
- (d) Enhancement of skills for the adoption, adaptation, installation, operation and maintenance of specific ESTs and methodologies for evaluating alternative technological options;
- (e) Capacity-building of existing national and regional institutions relevant to technology transfer, taking into account country- and sector-specific circumstances, including South-South cooperation and collaboration;
- (f) Training on project development, management and operation of climate technologies;
- (g) Development and implementation of standards and regulations that promote the use, transfer of, and access to ESTs, taking cognizance of country-specific policies, programmes and circumstances;
- (h) Development of skills and know-how in conducting technology needs assessments;
- (i) Improvement of knowledge on energy efficiency and utilization of renewable energy technologies.

19. The following is the initial list of needs for capacity-building for the development and enhancement of endogenous capacities and technologies in developing countries. These shall be country-driven processes supported by developed country Parties.

- (a) Strengthening existing and, where needed, establishing relevant organizations and institutions in developing countries;
- (b) Strengthening existing and, where needed, establishing expert exchange, scholarship and cooperative research programmes in relevant national and regional institutions in developing countries for the transfer, operation, maintenance, adaptation, diffusion and development of ESTs;
- (c) Capacity-building to adapt to the adverse effects of climate change;
- (d) Strengthening the endogenous capacities and capabilities in research, development, technological innovation, adoption and adaptation of ESTs and technology for systematic observation relevant to climate change and its associated adverse effects;
- (e) Improvement of knowledge in energy efficiency and utilization of renewable energy technologies.

Implementation

20. In implementing the capacity-building activities, developed country Parties should:

(a) Make available resources to assist developing countries in the implementation of the capacity-building to enhance the implementation of Article 4.5 taking into account the lists contained in paragraphs 18 and 19 above. These resources should include additional financial and technical resources to enable developing countries to undertake country-level needs assessments, and to develop specific capacity-building activities consistent with enhancing implementation of Article 4.5;

(b) Respond to the capacity-building needs and priorities of developing countries in a coordinated and timely manner, and support activities implemented at the national and, as appropriate, subregional and regional levels;

(c) Give particular attention to the needs of least developed countries and small island developing States amongst them.

21. All Parties should improve the coordination and effectiveness of capacity-building activities related to the development and transfer of technologies. All Parties should promote conditions conducive to the sustainability and effectiveness of these capacity-building activities.

5. Mechanisms for technology transfer

Definition

22. The mechanisms for technology transfer, as identified in this section, are to facilitate support of institutional and methodological activities: (i) to enhance the coordination of the full range of stakeholders in different countries and regions and (ii) to engage them in cooperative efforts to accelerate the development and diffusion, including transfer, of environmentally sound technologies, know-how and practices to and between developing country Parties and Parties included in Annex I but not included in Annex II through technology cooperation and partnerships (public/public, private/public and private/private) and (iii) to facilitate development of projects and programmes that support such ends.

Purpose

23. The purpose of the proposed mechanisms is to address barriers to technology transfer, information needs and progress on technology transfer to enhance the implementation of Article 4.5 of the Convention.

Implementation

Institutional arrangement for technology transfer

24. The intergovernmental consultative group of scientific and technical experts on technology transfer shall be established and consist of ten (10) members elected by the Conference of the Parties on the basis of nominations by the Parties as follows:

(a) One member from each of the five regional groups of the United Nations and one member from the small island developing States, taking into account the current practice of the Bureau of the United Nations Framework Convention on Climate Change;

(b) Two other members from Parties included in Annex I; and

(c) Two other members from Parties not included in Annex I.

25. Members of the intergovernmental consultative group shall serve in their personal capacities and shall have recognized competence relating to climate change and in relevant fields such as the development and transfer of technologies and know-how, and scientific, technical and socio-economic fields.

26. The intergovernmental consultative group shall elect annually a Chairperson and Vice-Chairperson from amongst its members, with one being a member from a Party included in Annex I and the other being a member from a Party not included in Annex I. The Chairperson and Vice-Chairperson shall alternate annually between a member from a Party included in Annex I and a member from a Party not included in Annex I.

27. Decisions by the intergovernmental consultative group shall be adopted by consensus. If all efforts at reaching a consensus have been exhausted and no agreement has been reached, decisions shall as a last resort be adopted by a three-quarters majority of the members present and voting at the meeting.

28. The intergovernmental consultative group shall meet twice a year in conjunction with the session of the subsidiary bodies.

29. The secretariat shall facilitate the organization of meetings of the intergovernmental consultative group and the preparation of its report to the SBSTA at its subsequent sessions and to the Conference of the Parties, which will be made available to the Parties.

30. The Conference of the Parties will review at its tenth session the progress of the work and terms of reference, including status and continuation of the intergovernmental consultative group.

II. CAPACITY-BUILDING IN DEVELOPING COUNTRIES (NON-ANNEX I PARTIES)

Draft decision -/CP.6

Capacity-building in developing countries (non-Annex I Parties)

The Conference of the Parties,

Being guided by Article 4.1, 4.3, 4.4, 4.5 and 4.7, in the context of Article 3, and Articles 5 and 6 of the Convention,

Recalling the provisions related to capacity-building for developing countries contained in its decisions 11/CP.1, 10/CP.2, 11/CP.2, 9/CP.3, 2/CP.4, 4/CP.4, 5/CP.4, 6/CP.4, 7/CP.4, 12/CP.4 and 14/CP.4,

Noting Article 10 (c), (d) and (e), and Article 11 of the Kyoto Protocol,

Recalling also the paragraphs on capacity-building of Agenda 21 and the Programme for the Further Implementation of Agenda 21,¹

Reaffirming its decision 10/CP.5,

Reaffirming also that capacity-building for developing countries is essential to enable them to participate fully in, and to implement effectively their commitments under the Convention,

1. *Adopts the framework for capacity-building in developing countries annexed to this decision;*
2. *Decides that this framework should guide capacity-building activities related to the implementation of the Convention and effective participation in the Kyoto Protocol process;*
3. *Decides to give immediate effect to this framework in order to assist developing countries to implement the Convention and to effectively participate in the Kyoto Protocol process;*
4. *Notes that areas for capacity-building identified under the Convention are relevant to the preparation of developing country Parties for their effective participation in the Kyoto Protocol process;*
5. *Decides that implementation of the annexed framework shall be funded in accordance with decisions -/CP.6 and -/CP.6 (Decisions on additional guidance to an operating entity of the financial mechanism; and on funding and resource levels);*

¹ A/RES/S-19/2.

6. *Invites* bilateral and multilateral agencies, and other intergovernmental organizations and institutions, to inform the Conference of the Parties, through the secretariat, of capacity-building activities conducted to assist developing country Parties with their implementation of the framework;

7. *Encourages* bilateral and multilateral agencies, and other intergovernmental organizations and institutions to consult with developing countries in formulating programmes and action plans to support capacity-building activities in accordance with the annexed framework;

8. *Requests* the secretariat, in accordance with this framework for capacity-building, and consistent with Article 8 of the Convention, to undertake the following tasks:

(a) To cooperate with the operating entity of the financial mechanism, its implementing agencies and other entities for capacity-building to facilitate the implementation of this framework;

(b) To collect, process, compile and disseminate, in both printed and electronic formats, the information needed by the Conference of the Parties or its subsidiary bodies to review the progress in the implementation of this framework for capacity-building, drawing in particular on information contained in:

- (i) National communications of developing country Parties relating to capacity-building activities;
- (ii) National communications of Parties included in Annex II on activities and programmes undertaken to facilitate capacity-building in developing countries related to the implementation of this framework;
- (iii) Reports from the Global Environment Facility and other agencies;

(c) To provide reports to the Conference of the Parties at each of its sessions on activities to implement this framework;

9. *Decides* that the Subsidiary Body for Implementation will regularly monitor the progress of the implementation of this framework, taking into account the information provided under paragraph 8 (b) and (c) above and reporting to the Conference of the Parties at each of its sessions;

10. *Decides* to conduct a comprehensive review of the implementation of this framework at its ninth session and every five years thereafter;

11. *Invites* Parties to provide information through national communications and other reports to enable the Subsidiary Body for Implementation to monitor progress in the implementation of this framework;

12. *Recommends* that the Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol, at its first session, adopt a decision containing a framework on

capacity-building that reaffirms this framework with additional reference to priority areas for capacity-building relating to the implementation of the Kyoto Protocol;

ANNEX

Framework for capacity-building in developing countries

A. Purposes

1. This framework for capacity-building in developing countries sets out the scope and provides the basis for action on capacity-building related to the implementation of the Convention and preparation for the effective participation of developing countries in the Kyoto Protocol process that will in a coordinated manner assist them in promoting sustainable development while meeting the objective of the Convention. It should serve as a guide for the Global Environment Facility as an operating entity of the financial mechanism and be considered by multilateral and bilateral organizations in their capacity-building activities related to the implementation of the Convention and preparation for their effective participation in the Kyoto Protocol process.

B. Guiding principles and approaches

2. This framework for capacity-building in developing countries is guided and informed by, *inter alia*, Article 4.1, 4.3, 4.4, 4.5 and 4.7, in the context of Article 3, and Articles 5, 6 and 11.1 of the Convention, and relevant provisions contained in decisions 11/CP.1, 10/CP.2, 11/CP.2, 9/CP.3, 2/CP.4, 4/CP.4, 5/CP.4, 6/CP.4, 7/CP.4, 12/CP.4, 14/CP.4, and 10/CP.5, and takes into account Articles 10 (c), 10 (d), 10 (e), and 11 of the Kyoto Protocol.

3. Capacity-building activities related to the implementation of the Convention by developing countries and to the preparation for their effective participation in the Kyoto Protocol process should build on work already undertaken by developing countries, as well as on the work undertaken with support from multilateral and bilateral organizations.

4. The capacity-building needs already identified in the various decisions of the Conference of the Parties should continue to be comprehensively and promptly addressed to promote sustainable development in developing countries through the effective implementation of the Convention and preparation for their effective participation in the Kyoto Protocol process.

5. There is no “one size fits all” formula for capacity-building. Capacity-building must be country-driven, addressing the specific needs and conditions of developing countries and reflecting their national sustainable development strategies, priorities and initiatives. It is primarily to be undertaken by and in developing countries in accordance with the provisions of the Convention.

6. Capacity-building is a continuous, progressive and iterative process, the implementation of which should be based on the priorities of developing countries.

7. Capacity-building activities should be undertaken in an effective, efficient, integrated and programmatic manner, taking into consideration the specific national circumstances of developing countries.

8. Capacity-building activities undertaken within this framework should maximize synergies between the Convention and other global environmental agreements, as appropriate.

9. Capacity-building is crucial to developing countries, especially those that are particularly vulnerable to the adverse effects of climate change. The special circumstances of least developed countries and small island developing States need to be taken into account in the implementation of this framework. They include:

- (a) Fragile ecosystems;
- (b) High population pressure and isolated geographical locations;
- (c) Weak economies, low incomes, high levels of poverty and a lack of foreign investment;
- (d) Land degradation, desertification;
- (e) Undeveloped services, *inter alia*, meteorological and hydrological services and water resources management;
- (f) Lack of early warning systems for natural disaster management;
- (g) Inadequate food security.

10. Capacity-building involves “learning by doing”. Demonstration projects may be used in identifying and learning about the specific capacities that need to be further developed in developing countries.

11. Existing national institutions have an important role to play in supporting capacity-building activities in developing countries. Such centres can incorporate traditional skills, knowledge and practices, to provide appropriate services in developing countries and facilitate information sharing. Whenever possible and effective, therefore, capacity-building should mobilize these existing national, subregional and regional institutions and the private sector in developing countries and build on existing processes and endogenous capacities.

12. National coordinating mechanisms and focal points and national coordinating entities have an important role to play in ensuring coordination at the country and regional levels and may serve as the focal point for coordinating capacity-building activities.

13. Multilateral and bilateral bodies are encouraged to take account of this framework in their consultations with developing countries when supporting capacity-building activities related to the implementation of the Convention and the preparation for effective participation by developing countries in the Kyoto Protocol process.

C. Objective and scope of capacity-building

Objective

14. Capacity-building should assist developing countries to build, develop, strengthen, enhance, and improve their capabilities to achieve the objective of the Convention through the implementation of the provisions of the Convention and the preparation for their effective participation in the Kyoto Protocol process.

Scope

15. The following is the initial scope of needs and areas for capacity-building in developing countries as broadly identified in the annex to decision 10/CP.5, in the compilation and synthesis document prepared by the secretariat² and in submissions by Parties:³

- (a) Institutional capacity-building, including the strengthening or establishment, as appropriate, of national climate change secretariats or national focal points;
- (b) Enhancement and/or creation of an enabling environment;
- (c) National communications;
- (d) National climate change programmes;
- (e) Greenhouse gas inventories, emission database management, and systems for collecting, managing and utilizing activity data and emission factors;
- (f) Vulnerability and adaptation assessment;
- (g) Capacity-building for implementation of adaptation measures;
- (h) Assessment for implementation of mitigation options;
- (i) Research and systematic observation, including meteorological, hydrological and climatological services;
- (j) Development and transfer of technology;
- (k) Improved decision-making, including assistance for participation in international negotiations;
- (l) Clean development mechanism;
- (m) Needs arising out of the implementation of Article 4.8 and 4.9 of the Convention;
- (n) Education, training and public awareness;
- (o) Information and networking, including the establishment of databases.

² FCCC/SB/2000/INF.1.

³ FCCC/SB/2000/INF.5.

16. Other capacity-building needs and possible responses are being identified by the Parties in their discussions of other issues. The decisions resulting from these discussions, as well as other activities related to the implementation of the Convention and preparation for their effective participation in the Kyoto Protocol process, should continue to inform the scope and implementation of this framework.

Specific scope for capacity-building in least developed countries

17. The least developed countries, and small island developing States amongst them, are among the most vulnerable to extreme weather events and the adverse effects of climate change. They also have the least capacity to cope with and adapt to the adverse effects of climate change. The following is the initial assessment of needs and priority areas for capacity-building in these countries:

- (a) Strengthening existing and, where needed, establishing national climate change secretariats or focal points to enable the effective implementation of the Convention and effective participation in the Kyoto Protocol process, including preparation of national communications;
- (b) Developing an integrated implementation programme which takes into account the role of research and training in capacity-building;
- (c) Developing and enhancing technical capacities and skills to carry out and effectively integrate vulnerability and adaptation assessments into sustainable development programmes and develop national adaptation programmes of action;
- (d) Strengthening existing and, where needed, establishing national research and training institutions in order to ensure the sustainability of the capacity-building programmes;
- (e) Strengthening the capacity of meteorological and hydrological services to collect, analyse, interpret and disseminate weather and climate information to support implementation of national adaptation programmes of action;
- (f) Enhancing public awareness (level of understanding and human capacity development).

D. Implementation

Actions to enhance the implementation of this framework, taking into account the initial scope outlined in paragraphs 15 to 17

18. All Parties should improve the coordination and effectiveness of capacity-building efforts through dialogue between and among Parties included in Annex II, developing country Parties, and bilateral and multilateral institutions. All Parties should support the operation of this framework and promote conditions conducive to the sustainability and effectiveness of capacity-building activities.

19. In implementing this framework, developing country Parties should:

- (a) Continue to identify their specific needs, options and priorities for capacity-building on a country-driven basis, taking into account existing capacities and past and current activities;
- (b) Promote South-South cooperation by utilizing the services of institutions in developing countries that can support capacity-building activities at the national, subregional and regional levels, wherever possible and effective;
- (c) Promote the participation of a wide range of stakeholders, including governments at all levels, national and international organizations, civil society and the private sector, as appropriate;
- (d) Promote the coordination and sustainability of activities undertaken within this framework, including the efforts of national coordinating mechanisms, focal points, and national coordinating entities;
- (e) Facilitate the dissemination and sharing of information on capacity-building activities conducted by developing countries for better coordination and South-South cooperation.

20. In implementing this framework, Parties included in Annex II should:

- (a) Provide additional financial and technical resources to assist developing countries, in particular the least developed countries and small island developing States amongst them, in the implementation of this framework, including promptly available financial and technical resources to enable them to undertake country-level needs assessments and to develop specific capacity-building activities consistent with this framework;
- (b) Respond to the capacity-building needs and priorities of developing countries, in particular the least developed countries and small island developing States amongst them, in a coordinated and timely manner, and support activities implemented at the national and, as appropriate, subregional and regional levels;
- (c) Give particular attention to the needs of least developed countries and small island developing States amongst them.

Financing and operation

21. Financial and technical resources should be made available, through an operating entity of the financial mechanism and, as appropriate, multilateral and bilateral agencies and the private sector, to assist developing countries, in particular the least developed countries and small island developing States amongst them, in the implementation of this framework.
22. In response to this framework, the operating entity of the financial mechanism should elaborate a country-driven strategy for its capacity-building activities.
23. Multilateral and bilateral agencies are encouraged to take constructive action to support capacity-building activities in this framework through streamlined and coordinated approaches and in a timely manner.

24. Financial and other assistance is to be made available to developing countries, in particular to the least developed countries and small island developing States amongst them, to enable them to continue to determine, assess and prioritize their needs for capacity-building in a simple, timely manner and to assist them in strengthening existing institutions and, when needed, to establish the institutional arrangements to implement effective capacity-building activities.

25. The capacity-building activities undertaken within this framework are to be country-driven and implemented primarily at the country level.

26. In order to facilitate the exchange of information and cooperation, developing countries, in collaboration with relevant institutions, should identify regional, subregional and sectoral activities that can effectively and efficiently address common capacity-building needs.

27. The results of activities conducted by the Global Environment Facility as a multilateral financial institution, including the Capacity Development Initiative, as well as activities undertaken by multilateral, bilateral and private sector entities, may be considered in further developing capacity-building activities within this framework at the regional and subregional levels.

Time-frame

28. This framework for capacity-building should be implemented promptly, taking into account the immediate, medium- and long-term priority needs identified by developing countries.

29. Developing countries which have already identified their capacity-building priorities through ongoing work aimed at the implementation of the Convention, should be able to promptly implement capacity-building activities under this framework.

30. The immediate priority needs of developing countries, in particular the least developed countries and small island developing States amongst them, should be addressed urgently in the implementation of this framework.

Review of progress

31. The Conference of the Parties, through the Subsidiary Body for Implementation, shall regularly monitor and review the progress in the implementation of this framework.

32. The Global Environment Facility, as the operating entity of the financial mechanism, is requested to report on its progress in support of the implementation of this framework in its reports to the Conference of the Parties.

Role of the secretariat

33. In accordance with this framework for capacity-building, the secretariat is requested, consistent with Article 8 of the Convention, to undertake the following tasks:

(a) To cooperate with the operating entity of the financial mechanism, its implementing agencies and other entities for capacity-building to facilitate the implementation of this framework;

(b) To collect, process, compile and disseminate the information needed by the Conference of the Parties or its subsidiary bodies to review the progress in the implementation of this framework for capacity-building.

III. CAPACITY-BUILDING IN COUNTRIES WITH ECONOMIES IN TRANSITION

Draft decision -/CP.6

Capacity-building in countries with economies in transition

The Conference of the Parties,

Recalling its decision 11/CP.5,

Recalling Articles 4.1, 4.2, 4.5 and 4.6, 5, 6 and 12 of the Convention,

Noting Articles 2, 3, 5, 6, 7, 10 and 17 of the Kyoto Protocol,

Further recalling its decisions 9/CP.2, 6/CP.4 and 7/CP.4,

Having considered the relevant recommendations of the Subsidiary Body for Scientific and Technological Advice and the Subsidiary Body for Implementation,¹

1. *Adopts* the framework for capacity-building activities in countries with economies in transition contained in the annex below;
2. *Decides* to give immediate effect to this framework, in order to assist Parties with economies in transition to implement the Convention;
3. *Notes* that many areas for capacity-building identified under the Convention are also relevant to the preparation of Parties with economies in transition for participation in the Kyoto Protocol when it enters into force;
4. *Decides* to review the effectiveness of the implementation of the framework at regular intervals;
5. *Invites* Parties included in Annex II and Parties with economies in transition to provide information to enable the Conference of the Parties and the subsidiary bodies to monitor progress in the implementation of this framework, consistent with guidelines for the preparation of national communications;
6. *Urges* Parties included in Annex II, through multilateral agencies, including through the Global Environment Facility within its mandate, and bilateral agencies and the private sector, as appropriate, to make available financial and technical support for the implementation of this framework for capacity-building, including assistance for the development of national action plans of Parties with economies in transition consistent with their priorities;

¹ FCCC/SBSTA/2000/10, FCCC/SBI/2000/10.

7. *Further urges* multilateral and bilateral agencies to coordinate in support of the implementation of this framework for capacity-building;

8. *Recommends* that the Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol at its first session, adopt a decision endorsing a framework for capacity-building under the Convention that parallels the framework contained in the annex below, with additional reference to priority areas for capacity-building relating to implementation of the Kyoto Protocol;

9. *Requests* the secretariat, consistent with Article 8 of the Convention:

(a) To cooperate with multilateral and bilateral institutions to facilitate the implementation of this framework;

(b) To collect, process, compile and disseminate the information needed by the Conference of the Parties and the subsidiary bodies to monitor progress in the implementation of this framework.

ANNEX

Framework for capacity-building in countries with economies in transition

A. Purpose

1. The purpose of this framework for capacity-building is to set out the scope and basis for action for capacity-building activities in countries with economies in transition (EIT Parties) under the Convention and for the preparation of EIT Parties for their participation in the Kyoto Protocol when it enters into force.

B. Guiding principles and approaches

2. This framework for capacity-building in EIT Parties is guided and informed by, *inter alia*, Articles 4.1, 4.2, 4.5 and 4.6, 5, 6 and 12 of the Convention and relevant provisions contained in decisions 9/CP.2, 6/CP.4, 7/CP.4 and 11/CP.5 and takes account of Articles 2, 3, 5, 6, 7 and 17 of the Kyoto Protocol.

3. As Parties included in Annex I, EIT Parties have quantified emission limitation and reduction commitments that impose challenges to their existing capacities to implement the Convention. As Parties undergoing the process of transition to a market economy, they need to enhance their ability to address climate change issues. Capacity-building is therefore critical to the effective implementation by EIT Parties of their commitments under the Convention and the preparation of EIT Parties for their participation in the Kyoto Protocol when it enters into force.

4. Capacity-building for EIT Parties must be country-driven, consistent with their national sustainable development strategies, reflect their national initiatives and priorities, respond to needs determined and prioritized by EIT Parties themselves and be primarily undertaken by and in EIT Parties in partnership with other Parties and relevant organizations, as appropriate, in accordance with the provisions of the Convention.

5. Capacity-building should contribute to the effective implementation of the Convention by EIT Parties and the preparation of EIT Parties for their participation in the Kyoto Protocol when it enters into force.

6. Capacity-building efforts are more effective when they take place within an enabling environment conducive to the development of human, institutional and technical capacity.

7. Capacity-building should be results-oriented and implemented in an integrated and programmatic manner to facilitate its monitoring and evaluation, cost-effectiveness and efficiency.

8. Capacity-building is a continuous process aimed at strengthening or establishing, as appropriate, relevant institutions, organizational structures, and human resources in order to strengthen expertise relevant to paragraph 3 of this framework.

9. Capacities should be developed and strengthened in a manner and under conditions that will work towards sustainability and support the short- and long-term objectives and priorities of EIT Parties under the Convention.
10. Capacity-building involves "learning by doing". Capacity-building activities should be designed and implemented in a flexible manner.
11. Capacity-building should improve the coordination and effectiveness of existing efforts and promote the participation of and dialogue between a wide range of actors and constituencies, including governments at all levels, international organizations, civil society and the private sector.
12. Wherever possible, capacity-building should utilize existing institutions and bodies and build on existing processes and endogenous capacities.
13. National focal points and other institutions such as research centres and universities and other relevant organizations should play an important role in providing capacity-building services and facilitating the flow of knowledge, best practices and information.
14. Capacity-building should be designed so that it results in the development, strengthening and enhancement of institutional capacities, human resources, knowledge and information, methodologies and practices, and the participation and networking of EIT Parties to promote sustainable development and for the purpose set out in paragraph 1 of this framework.
15. Capacity-building in support of achieving the objectives of the Convention should maximize synergies between the Convention and other global environmental agreements, as appropriate.
16. Capacity-building is more effective when it is coordinated at all levels (national, regional and international) through dialogue between and among Parties included in Annex I, and when past and existing efforts are taken into account.

C. Objective and scope of capacity-building

Objective

17. The objective of capacity-building is to build the capacity of EIT Parties to enable them to effectively implement the objective of the Convention and to prepare for their participation in the Kyoto Protocol when it enters into force.

Scope

18. To ensure that capacity-building efforts are country-driven, each EIT Party should, within the scope for capacity-building, determine its specific objectives, needs, priorities and options to implement the Convention and to prepare for its participation in the Kyoto Protocol when it enters into force, consistent with its national sustainable development strategy, taking into account existing capacities and past and current activities undertaken by the country itself and in partnership with bilateral and multilateral institutions and the private sector.

19. The needs for capacity-building in EIT Parties were first identified in the compilation and synthesis document prepared by the secretariat (FCCC/SB/2000/INF.2) based on the submissions of EIT Parties (FCCC/SB/2000/INF.7). The general areas and needs for capacity-building are listed below. This scope for capacity-building may be revised as further information is made available and as needs and priorities are further identified.

20. General priority areas for capacity-building identified by EIT Parties related to the implementation of the Convention, which may also be relevant to their preparation for participation in the Kyoto Protocol, are to be identified in their national action plan for capacity-building, and include:

- (a) National greenhouse gas (GHG) inventories;
- (b) Projections of GHG emissions;
- (c) Policies and measures, and the estimation of their effects;
- (d) Impact assessment and adaptation;
- (e) Research and systematic observation;
- (f) Education, training and public awareness;
- (g) Transfer of environmentally sound technologies;
- (h) National communications and national climate action plans;
- (i) National systems for estimation of GHG emissions;
- (j) Modalities for accounting relating to targets, timetables and national registries;
- (k) Reporting obligations;
- (l) Joint implementation projects and emissions trading.

21. In order to maximize available resources for capacity-building and to facilitate exchange and cooperation among EIT Parties, multilateral and bilateral agencies in consultation with EIT Parties should assist, as appropriate, the efforts of EIT Parties themselves to identify, develop and implement national, regional, subregional and sectoral activities that meet the capacity-building needs of EIT Parties. The results of the current and next phase of the Capacity Development Initiative of the Global Environment Facility could provide valuable inputs for these activities.

D. Implementation

Responsibilities for implementation

22. In implementing the activities undertaken within this framework for capacity-building, EIT Parties and Parties included in Annex II have the following mutual responsibilities:

- (a) To improve the coordination and effectiveness of existing efforts;

(b) To provide information to enable the Conference of the Parties to monitor progress in the implementation of this framework for capacity-building.

23. In the implementation of this framework for capacity-building, EIT Parties have the following responsibilities:

(a) To provide an enabling environment to promote the sustainability and effectiveness of capacity-building activities relating to the implementation of the ultimate objective of the Convention;

(b) To identify their specific needs, priorities and options for capacity-building on a country-driven basis, taking into account existing capacities and past and current activities;

(c) To identify and provide information on their own capacity-building activities;

(d) To promote cooperation among EIT Parties as well as to report to the Conference of the Parties on these activities in their national communications;

(e) To ensure the mobilization and sustainability of national capacities, including the institutional leadership necessary for national coordination and the effectiveness of capacity-building activities;

(f) To promote the participation in and access to capacity-building activities of all stakeholders, including governments, civil society and the private sector, as appropriate.

24. In cooperating with EIT Parties to support the implementation of this framework for capacity-building, Parties included in Annex II have the following responsibilities:

(a) To assist EIT Parties, including by making available financial and other resources, to undertake country-level needs assessments to effectively implement the Convention and, as appropriate, to prepare them for participation in the Kyoto Protocol when it enters into force;

(b) To assist EIT Parties, including through the provision of financial and other resources, to implement options for capacity-building consistent with their specific priorities and this framework.

Financing

25. The Parties included in Annex II, through multilateral agencies, including through the Global Environment Facility within its mandate, and bilateral agencies and the private sector as appropriate, are requested to make available financial and technical support to assist EIT Parties in the implementation of this framework for capacity-building.

Time-frame

26. The implementation of activities undertaken within this framework for capacity-building should commence as soon as possible.

Monitoring of progress

27. The Conference of the Parties, through the subsidiary bodies, shall monitor the effectiveness of the implementation of this framework for capacity-building.

28. Information to enable the Conference of the Parties to monitor the effectiveness of the implementation of this framework should be reported by Parties. Other institutions involved in capacity-building in EIT Parties are invited to provide information for this purpose.

Role of the secretariat

29. In accordance with this framework for capacity-building, the secretariat is requested, consistent with Article 8 of the Convention, to undertake the following tasks:

(a) To cooperate with multilateral and bilateral institutions to facilitate the implementation of this framework;

(b) To collect, process, compile and disseminate the information needed by the Conference of the Parties or its subsidiary bodies to monitor the progress in the implementation of this framework for capacity-building.

**IV. IMPLEMENTATION OF ARTICLE 4, PARAGRAPHS 8 AND 9,
OF THE CONVENTION (DECISION 3/CP.3 AND ARTICLE 2,
PARAGRAPH 3, AND ARTICLE 3, PARAGRAPH 14, OF THE
KYOTO PROTOCOL)**

Draft decision -/CP.6

**Implementation of Article 4, paragraphs 8 and 9, of the Convention (decision 3/CP.3
and Articles 2, paragraph 3 and 3, paragraph 14, of the Kyoto Protocol)**

The Conference of the Parties,

Recalling its decisions 3/CP.3, 5/CP.4, and 12/CP.5,

Acknowledging the importance of a country-driven approach that allows developing country Parties to pursue the specific activities most appropriate to their unique national circumstances,

Acknowledging also that action related to adaptation should follow an assessment and evaluation process, based on national communications and/or other relevant information, so as to prevent maladaptation and to ensure that adaptation actions are environmentally sound and will produce real benefits in support of sustainable development,

Reaffirming that the specific needs and special circumstances of developing country Parties, especially those that are particularly vulnerable to the adverse effects of climate change, and of those Parties, especially developing country Parties, that would have to bear a disproportionate or abnormal burden under the Convention, should be given full consideration,

Underlining the importance of the ongoing work of the secretariat in compiling and disseminating information on methods and tools to evaluate impacts and adaptation strategies,

Affirming that responses to climate change should be coordinated with social and economic development in an integrated manner with a view to avoiding adverse impacts on the latter, taking into full account the legitimate priority needs of developing countries for the achievement of sustained economic growth and the eradication of poverty,

Acknowledging the need to sensitize policy makers and the general public in Parties not included in Annex I to the Convention (non-Annex I Parties) to climate change and its effects, in accordance with Article 6 (a) of the Convention,

Acknowledging the efforts already made by Parties to meet the specific needs and concerns of developing country Parties, in particular the least developed countries, with regard to adaptation,

Acknowledging that the impact of the implementation of response measures will differ significantly from country to country, depending on each country's unique national circumstances, including the structure of its economy, trade and investment flows, natural resource endowment, social system, legal regime, and population growth rate,

Recognizing that the least developed countries are among the most vulnerable to the adverse effects of climate change, and in particular that widespread poverty limits their adaptive capacity,

Acknowledging that the human, infrastructural and economic conditions of the least developed countries severely limit their capacities to participate effectively in the climate change process,

Having considered the report,¹ in two parts, on the two workshops referred to in decision 12/CP.5,

I

ADVERSE EFFECTS OF CLIMATE CHANGE

1. *Requests* Parties not included in Annex I to the Convention (non-Annex I Parties) to provide information, including in their national communications, and/or any other relevant information sources, on their specific needs and concerns arising from the adverse effects of climate change;
2. *Stresses* the need for Parties included in Annex II to the Convention (Annex II Parties) to provide detailed information, including in their national communications, on support programmes to meet the specific needs and circumstances of developing country Parties arising from the adverse effects of climate change;
3. *Encourages* Parties to exchange information on their experience regarding the adverse effects of climate change and on measures to meet their needs arising from these adverse effects;
4. *Decides* that financial and technological support for activities to address the adverse effects of climate change in developing country Parties should be provided through, *inter alia*, the adaptation fund. Activities eligible for such support include the following:
 - (a) Information and methodologies:
 - (i) Improving data collection and information gathering, as well as the analysis, interpretation and dissemination to end-users;
 - (ii) Integrating climate change considerations into sustainable development planning;

¹ FCCC/SB/2000/2.

- (iii) Providing training in specialized fields relevant to adaptation such as climate and hydroclimate studies, geographical information systems, environmental impact assessment, modelling, integrated coastal zone management, soil and water conservation and soil restoration;
 - (iv) Strengthening existing and, where needed, establishing national and regional systematic observation and monitoring networks (sea level, climate and hydrological regimes, fire hazards, land degradation, floods, cyclones and droughts);
 - (v) Strengthening existing and, where needed, establishing national and regional centres and institutions for the provision of research, training, education and scientific and technical support in specialized fields relevant to climate change, utilizing information technology as much as possible;
 - (vi) Strengthening existing and, where needed, establishing national and regional research programmes on climate variability and climate change, oriented towards improving the knowledge of the climate system on the regional scale, and creating national and regional scientific capability;
 - (vii) Supporting education and training in, and public awareness of, issues relating to the adverse effects of climate change, for example through workshops, and information dissemination;
- (b) Vulnerability and adaptation:
- (i) Supporting enabling activities for vulnerability and adaptation assessment;
 - (ii) Enhancing technical training for integrated climate change impact, vulnerability and adaptation assessments, across all relevant sectors, and environmental management related to climate change;
 - (iii) Enhancing capacity, including institutional capacity, to integrate adaptation into sustainable development programmes;
 - (iv) Promoting the transfer of adaptation technologies;
 - (v) Establishing pilot or demonstration projects to show how adaptation planning and assessment can be practically translated into projects that will provide real benefits, and may be integrated into national policy and sustainable development planning, on the basis of information provided in the national communications from non-Annex I Parties, and/or other relevant sources, and of the staged approach endorsed by the Conference of the Parties in its decision 11/CP.1;
 - (vi) Starting the implementation of adaptation activities where sufficient information is available to warrant such activities, *inter alia*, in the areas of water resources management, land management, agriculture, health,

infrastructure development, fragile ecosystems, and integrated coastal zone management;

- (vii) Improving monitoring of diseases and vectors affected by climate change, and related forecasting and early-warning systems, and in this context, improving disease control and prevention;
- (viii) Capacity-building, including institutional capacity, for preventive measures, planning, preparedness and management of disasters related to climate change, including contingency planning, in particular, for droughts and floods in areas prone to extreme weather events;
- (ix) Strengthening existing and, where needed, establishing early warning systems for extreme weather events in an integrated and interdisciplinary manner to assist developing country Parties, in particular those most vulnerable to climate change;
- (x) Strengthening existing and, where needed, establishing national and regional centres and information networks for rapid response to extreme weather events, utilizing information technology as much as possible;
- (xi) Improving climate-induced disaster relief for vulnerable developing country Parties under Article 4.8 and 4.9 of the Convention;
- (xii) Implementing measures regarding forest conservation, rehabilitation of degraded land, and combating desertification, particularly in Africa;

5. *Requests* the Subsidiary Body for Implementation to review, at its subsequent sessions, the progress of the above-mentioned activities and make recommendations thereon to the Conference of the Parties at its eighth session;

II

IMPACT OF THE IMPLEMENTATION OF RESPONSE MEASURES

6. *Requests* non-Annex I Parties to provide information in their national communications and/or other relevant reports, on their specific needs and concerns arising from the impact of the implementation of response measures;

7. *Requests* Annex II Parties and other Annex I Parties that are in a position to do so to provide detailed information, in their national communications and/or other relevant reports, on their existing and planned support programmes to meet the specific needs and concerns of developing country Parties arising from the impact of the implementation of response measures;

8. *Requests* Annex I Parties to assist non-Annex I Parties, based on methodological work, in the implementation of the activities mentioned in this section;

9. *Encourages* Parties to cooperate in creating favourable conditions for investment in sectors where such investment can contribute to economic diversification. Economic

diversification activities shall be eligible for support provided under the special climate change fund;

10. *Encourages* Parties to cooperate in the technological development of non-energy uses of fossil fuels, and requests Annex I Parties to support developing country Parties to this end;

11. *Encourages* Parties to cooperate in the development, diffusion and transfer of advanced fossil fuel technologies entailing less emissions of greenhouse gases, and/or technologies relating to fossil fuels, that capture and store greenhouse gases; and requests Annex I Parties to facilitate the participation of the least developed countries and other non-Annex I Parties in this effort;

12. *Urges* Annex I Parties to provide financial and technological support for strengthening the capacity of developing country Parties identified in Article 4.8 and 4.9 of the Convention for improving efficiency in upstream and downstream activities relating to fossil fuels, taking into consideration the need to improve the environmental efficiency of these activities;

13. *Recommends* that further methodological work relating to the impact of response measures address the following issues:

(a) Developing methodologies for assessing, and case studies describing, the impact of response measures since the Convention entered into force;

(b) Incorporating information from developing country Parties on the impact of response measures into the above-mentioned methodological work;

(c) Developing methodologies for assessing possible effects of alternative future response measures;

14. *Requests* the Subsidiary Body for Implementation to review, at its subsequent sessions, progress on the above-mentioned activities, with a view to making recommendations thereon to the Conference of the Parties at its eighth session;

III

IMPLEMENTATION OF ARTICLE 4.9 OF THE CONVENTION

15. *Decides* to establish a work programme for the implementation of Article 4.9 of the Convention, which would include activities covered under paragraphs 16 to 19 below;

16. *Decides* that the above-mentioned work programme shall include support for overcoming basic institutional limitations which impede the effective participation of the least developed countries in the Convention process, including through the following:

(a) Strengthening existing, and where needed establishing, national climate change secretariats and/or focal points to enable the effective implementation of the Convention and the Kyoto Protocol when it enters into force, in least developed country Parties;

(b) Supporting training, on an ongoing basis, in negotiating skills and language, where needed, to develop the capacity of negotiators from the least developed countries to participate effectively in the climate change process;

17. *Requests* the Subsidiary Body for Implementation to consider the recommendations related to the guidelines for the preparation of national adaptation programmes of action referred to in document FCCC/SBI/2001/7, which would serve as a voluntary, simplified and direct channel for communicating information relating to the vulnerability and adaptation needs of least developed country Parties, and to forward, as appropriate, a draft decision for consideration by the Conference of the Parties at its seventh session;

18. *Decides* that support be provided, through the Global Environment Facility, in accordance with criteria to be developed by the Global Environment Facility within the context of the guidance from the Conference of the Parties, for the implementation, by the least developed countries, of activities included in the national adaptation programmes of action referred to in paragraph 17 above;

19. *Requests* the Subsidiary Body for Implementation to consider the establishment of a least developed country expert group, *inter alia*, to assist in the development of national adaptation programmes of action, with a view to making recommendations thereon to the Conference of the Parties at its seventh session;

20. *Decides* to assess, at its eighth session, the status of implementation of the work programme for the implementation of Article 4.9 of the Convention and to consider further action thereon;

IV

FURTHER MULTILATERAL WORK RELATED TO ISSUES UNDER ARTICLE 4.8 AND 4.9 OF THE CONVENTION

21. *Requests* the secretariat to organize regional workshops in order to facilitate information exchange and integrated assessments, including for adaptation;

22. *Requests* the secretariat to organize a workshop, before the eighth session of the Conference of the Parties, on the status of modelling activities to assess the adverse effects of climate change and the impact of response measures already implemented on individual developing country Parties, including on how to enhance the participation of developing country experts in such efforts, and to report the results of this workshop to the Conference of the Parties at its eighth session;

23. *Requests* the secretariat to organize a workshop, before the eighth session of the Conference of the Parties, on insurance-related actions to address the specific needs and concerns of developing country Parties arising from the adverse effects of climate change and from the impact of the implementation of response measures, and to report the results of this workshop to the Conference of the Parties at its eighth session;

24. *Requests* the secretariat to organize a workshop, before the ninth session of the Conference of the Parties, on the possible synergies and joint action with the other multilateral environmental conventions and agreements such as the Convention to Combat Desertification, and to report the results of this workshop to the Conference of the Parties at its ninth session;

25. *Requests* the secretariat to organize a workshop, before the ninth session of the Conference of the Parties, on the needs and options of non-Annex I Parties for economic diversification, and on support programmes by Annex II Parties to address these needs, and to report the results of this workshop to the Conference of the Parties at its ninth session;

26. *Requests* the secretariat to organize a workshop, before the ninth session of the Conference of the Parties, on insurance and risk assessment in the context of climate change and extreme weather events, and to report the results of this workshop to the Conference of the Parties at its ninth session.

**V. MATTERS RELATING TO ARTICLE 3, PARAGRAPH 14, OF THE
KYOTO PROTOCOL**

Draft decision -/CP.6

Matters relating to Article 3, paragraph 14, of the Kyoto Protocol

The Conference of the Parties,

Having considered matters relating to Article 3.14 of the Kyoto Protocol,

Recalling its decision 8/CP.4, particularly as it refers to decision 5/CP.4,

Recognizing the special difficulties of those countries, especially developing countries, whose economies are particularly dependent on fossil fuel production, use and exportation, as a consequence of action taken to limit greenhouse gas emissions,

Recognizing the role that cost-effective and transparent flexibility mechanisms of the Kyoto Protocol could have in minimizing the impacts of response measures on Parties not included in Annex I to the Convention,

Acknowledging the role that can be played by the progressive reduction or phasing out of market imperfections, fiscal incentives, tax and duty exemptions and subsidies in all greenhouse gas emitting sectors, that run counter to the objective of the Convention and application of market instruments, in accordance with Article 2.1(a)(v) of the Kyoto Protocol,

Recommends that the Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol, at its first session after entry into force of the Protocol, adopt the following decision.

Draft decision -/CMP.1

Matters relating to Article 3, paragraph 14, of the Kyoto Protocol

The Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol,

Having considered matters relating to Article 3.14 of the Kyoto Protocol,

Recalling its decision 8/CP.4, particularly as it refers to decision 5/CP.4,

Recognizing the special difficulties of those countries, especially developing countries, whose economies are particularly dependent on fossil fuel production, use and exportation, as a consequence of action taken to limit greenhouse gas emissions,

Recognizing the role that cost-effective and transparent flexibility mechanisms of the Kyoto Protocol could have in minimizing the impacts of response measures on Parties not included in Annex I,

Acknowledging the role that can be played by the progressive reduction or phasing out of market imperfections, fiscal incentives, tax and duty exemptions and subsidies in all greenhouse gas emitting sectors, that run counter to the objective of the Convention and application of market instruments, in accordance with Article 2.1(a)(v) of the Kyoto Protocol,

1. *Decides* to establish a process to address the implementation of Article 3.14 of the Kyoto Protocol, including information exchange and the development of methodologies on all aspects of the minimization of adverse social, environmental and economic impacts on developing country Parties, particularly those identified in Article 4.8 and 4.9 of the Convention, including methodologies related to the establishment of funding, insurance and transfer of technology;

2. *Invites* Parties not included in Annex I to provide information on their specific needs and concerns related to the adverse social, environmental and economic impacts arising from the implementation of commitments under Article 3.1 of the Kyoto Protocol, and encourages Parties included in Annex II to provide support for that purpose;

3. *Invites* the Intergovernmental Panel on Climate Change, in cooperation with other relevant organizations, to prepare a technical paper on geological carbon storage technologies, covering current information, and report on it for consideration at its third session;

4. *Requests* Parties included in Annex I to report in their national communications on their actions to minimize the adverse social, environmental and economic impacts on developing country Parties pursuant to Article 3.14 of the Kyoto Protocol, including on the following:

(a) Reducing or phasing out subsidies associated with the production of fossil fuels in Parties included in Annex I;

(b) Cooperating in the technological development of non-energy uses of fossil fuels, and supporting developing country Parties to this end;

(c) Cooperating in the development, diffusion and transfer of advanced fossil fuel technologies entailing less emissions of greenhouse gases, and/or technologies relating to fossil fuels that capture and store greenhouse gases, and encouraging their wider use; and facilitating the participation of the least developed countries and other Parties not included in Annex I in this effort;

(d) Strengthening the capacity of developing country Parties identified in Article 4.8 and 4.9 of the Convention for improving efficiency in upstream and downstream activities relating to fossil fuels, taking into consideration the need to improve the environmental efficiency of these activities;

(e) Assisting developing country Parties which are highly dependent on the export and consumption of fossil fuels in diversifying their economies;

5. *Decides* to review the actions taken by Parties included in Annex I, in accordance with this decision, and consider at its third session what further actions are necessary, including the establishment of funding, insurance and transfer of technology, pursuant to Article 3.14;

6. *Requests* the secretariat to organize a workshop before the second session of the Conference of the Parties serving as the meeting of the Parties, on methodological issues related to the adverse social, environmental and economic impacts of response measures on developing country Parties under Article 3.14 of the Kyoto Protocol;

7. *Requests* the secretariat to organize a workshop before the second session of the Conference of the Parties serving as the meeting of the Parties, on the choice of policies and measures that Parties included in Annex I intend to adopt to meet their commitments under the Kyoto Protocol, on how these may adversely impact developing countries under Article 3.14, and on ways to minimize these impacts;

8. *Requests* the Subsidiary Body for Implementation to consider the output of the workshops referred to in this decision, and to make recommendations thereon to the Conference of the Parties serving as the meeting of the Parties at its second session.

VI. ADDITIONAL GUIDANCE TO AN OPERATING ENTITY OF THE FINANCIAL MECHANISM

Draft decision -/CP.6

Additional guidance to an operating entity of the financial mechanism

The Conference of the Parties,

Recalling its decisions 11/CP.1, 10/CP.2, 11/CP.2, 12/CP.2, 2/CP.4, 8/CP.5 and 10/CP.5,

Noting the extension of funding through the expedited procedures of the Global Environment Facility (GEF) for countries to address capacity-building needs identified in decision 2/CP.4 enabling Parties to maintain and enhance relevant national capacities and for the preparation of second national communications,

Noting also the launching of the GEF Country Dialogue Workshops, which have been designed to strengthen national coordination and capacity-building and to promote awareness-raising, and the results of the first phase of the GEF Capacity Development Initiative,

1. *Decides* that, in accordance with Articles 4.1, 4.3, 4.4, 4.5, 4.7, 4.8, 4.9, 4.10 and 11.1 of the Convention, the GEF, as an operating entity of the financial mechanism, shall provide financial resources to developing country Parties, in particular the least developed and the small island developing States amongst them, to:

(a) Strengthen in particularly vulnerable countries and regions identified in stage I activities, and especially in countries vulnerable to climate-related natural disasters, the implementation of country-driven stage II adaptation activities, further to decision 2/CP.4, paragraph 1 (a), that build upon work done at the national level in the context of national communications and/or on in-depth national studies;

(b) Establish pilot or demonstration projects to show how adaptation planning and assessment can be practically translated into projects that will provide real benefits, and may be integrated into national policy and sustainable development planning, on the basis of information provided in the national communications from non-Annex I Parties, and/or other relevant sources, and of the staged approach endorsed by the Conference of the Parties in its decision 11/CP.1;

(c) Implement concrete adaptation projects and programmes (stage III) in, *inter alia*, the areas of water resources management, land management, agriculture, health, infrastructure development, fragile ecosystems, and integrated coastal zone management;

(d) Support the continuation of the “country-team” approach, which enhances the collection, management, archiving, analysis, interpretation and dissemination of data on climate change issues and increases national commitment to the implementation of the objective of the Convention;

- (e) Enhance the capacity of their subregional and/or regional information networks to enable such networks to serve as repositories of climate change related information on vulnerability and adaptation assessments and geographic information systems;
- (f) Improve climate change related data collection (e.g. local and regional emission factors) and information-gathering, as well as the analysis, interpretation and dissemination of these data to national policy makers and other end-users;
- (g) Strengthen, and where needed establish:
 - (i) National, subregional or regional databases on climate change;
 - (ii) Subregional and/or regional climate change related institutions and “centres of excellence”, to enable these institutions and centres to provide a supportive framework, including information retrieval and technical support;
- (h) Develop and implement, as appropriate, prioritized projects identified in their national communications;
- (i) Undertake more in-depth public awareness and education activities and community involvement and participation in climate change issues;
- (j) Build the capacity, including institutional capacity, for preventive measures, planning, preparedness and management of disasters related to climate change, including contingency planning, in particular, for droughts and floods in areas prone to extreme weather events;
- (k) Strengthen existing, and where needed establish, early warning systems for extreme weather events in an integrated and interdisciplinary manner to assist developing country Parties, in particular those most vulnerable to climate change;
- (l) Support the continuation of GEF related programmes, which assist Parties that are at various stages of preparing and/or completing, their initial national communications;
- (m) Implement adaptation activities, including those related to the implementation of Article 4.8 and 4.9 of the Convention, as contained in decision -/CP.6 (*decision on implementation of Article 4.8 and 4.9 of the Convention*), employing, *inter alia*, resources of the adaptation fund;
- (n) Implement activities on capacity-building, transfer of technology and economic diversification, in accordance with decisions -/CP.6, -/CP.6 and -/CP.6 (*decisions on capacity-building, transfer of technologies and implementation of Article 4.8 and 4.9 of the Convention*), respectively; employing, *inter alia*, resources of the special climate change fund;
- (o) Implement other activities, programmes and measures related to climate change, in the areas of energy, transport, industry, agriculture, forestry and waste management as contained in decision -/CP.6 (*decision on funding and resource levels*) employing, *inter alia*, resources of the special climate change fund;

2. *Requests* the GEF to:

(a) Further streamline its procedures and policies, project cycle and delivery system with a view to making project preparations and implementation of the above-mentioned activities simpler, more transparent and more country-driven. In this regard, the project cycles of its implementing and executing agencies should be coordinated with the GEF project cycle;

(b) Ensure that funded projects are responsive to national needs and priorities and that these projects are integrated in national programmes;

(c) Urge its implementing and executing agencies to be more responsive to requests for GEF assistance from developing country Parties for climate change related project activities aimed at implementing the guidance of the Conference of the Parties;

(d) Further encourage the use of national and regional experts and/or consultants to enhance project development and implementation; in this regard, it should make its list of national and regional experts and/or consultants publicly available;

(e) Give consideration to measures to increase opportunities available to developing country Parties for accessing GEF funds for climate change activities aimed at implementing the guidance of the Conference of the Parties, including a review of the adequacy of the number of implementing and executing agencies available to deliver GEF programmes and projects;

(f) Include, in its annual report to the Conference of the Parties, information on:

(i) The share of the GEF replenishment allocated to implement climate change, including adaptation, activities;

(ii) The specific steps it has taken to implement the provisions of this decision.

VII. FUNDING AND RESOURCE LEVELS

Draft decision -/CP.6

Funding and resource levels

The Conference of the Parties,

Recalling the relevant provisions of the United Nations Framework Convention on Climate Change, in particular its Articles 4.1, 4.3, 4.4, 4.5, 4.7, 4.8, 4.9, 4.10 and 11,

Recalling also its decisions 11/CP.1 and 15/CP.1,

Noting also Articles 10, 11 and 12.8 of the Kyoto Protocol,

Noting further that predictable and adequate levels of funding should be made available to Parties not included in Annex I, which are new and additional to contributions that are allocated to the Global Environment Facility climate change focal area and to multilateral and bilateral funding, for the implementation of the Convention and the Kyoto Protocol,

Recalling further the importance of appropriate burden sharing among the developed country Parties,

1. *Decides* that a new trust fund, the adaptation fund, shall be established, to be managed by an adaptation fund council under the guidance of the Conference of the Parties until the entry into force of the Kyoto Protocol;
2. *Decides also* that the adaptation fund council referred to in paragraph 1 above, shall comprise ten members from Parties to the Kyoto Protocol as follows:
 - (a) One member from each of the five regional groups of the United Nations and one member from the small island developing States, taking into account the interest groups as reflected by the current practice of the Bureau of the Conference of the Parties;
 - (b) Two members from Parties included in Annex I; and
 - (c) Two members from Parties not included in Annex I;
3. *Decides also* that five members shall be elected for a term of two years and five members for a term of four years. Each time thereafter, the Conference of the Parties shall elect five new members for a term of four years. Members may be eligible to serve a maximum of two consecutive terms;
4. *Recommends* to the Conference of the Parties serving as the meeting of the Parties to the Protocol that upon entry into force of the Kyoto Protocol, the adaptation fund shall function under the guidance of, and be accountable to, the Conference of the Parties serving as the meeting of the Parties to the Protocol, which shall decide on its policies, programme

priorities and eligibility criteria and assume the responsibilities of the Conference of the Parties to the Convention in providing guidance to the adaptation fund council;

5. *Decides* that the adaptation fund shall be used, in accordance with the guidance provided by the Conference of the Parties and upon entry into force of the Kyoto Protocol, by the Conference of the Parties serving as the meeting of the Parties to the Protocol to finance:

(a) Pilot or demonstration and concrete adaptation projects and programmes, including those related to the transfer of or access to adaptation technologies. The areas to be covered shall, *inter alia*, be water resources management, land management, agriculture, health, infrastructure development, fragile ecosystems, and integrated coastal zone management, as well as the implementation of other adaptation activities identified under decision -/CP.6 (*decision on implementation of Article 4.8 and 4.9 of the Convention*);

(b) Measures regarding forest conservation, rehabilitation of degraded land and combating desertification, particularly in Africa;

6. *Decides also* that:

(a) Two per cent of the certified emission reductions generated from project activities implemented under the clean development mechanism shall be paid into the fund, in accordance with decision -/CP.6 (*decision on modalities and procedures for a clean development mechanism*);

(b) The Parties included in Annex I shall make financial contributions to the adaptation fund. These contributions are particularly urgent during the start-up period of the adaptation fund;

7. *Invites* the Global Environment Facility:

(a) To report to the Conference of the Parties at its eighth session on its readiness to establish the above-mentioned adaptation fund and council;

(b) If it is prepared to enter into the arrangements referred to in paragraph 7 (a) above, to participate in negotiations to revise the existing Memorandum of Understanding between the Global Environment Facility and the Conference of the Parties to cover the operation of this fund, with a view to its acceptance by the Conference of the Parties at its ninth session;

8. *Recommends* that, upon entry into force of the Kyoto Protocol, the Conference of the Parties serving as the meeting of the Parties to the Protocol and the entity entrusted with the operation of the adaptation fund shall agree upon arrangements for the operation of this fund, including annual reports on the management of the adaptation fund to the Conference of the Parties serving as the meeting of the Parties to the Protocol to enable it to provide further guidance, where appropriate;

9. *Decides* that a new trust fund, the special climate change fund, shall be established under the guidance of the Conference of the Parties until the entry into force of the Kyoto Protocol;

10. *Recommends* that, upon entry into force of the Kyoto Protocol, the special climate change fund shall function under the guidance of, and be accountable to, the Conference of the Parties serving as the meeting of the Parties to the Protocol, which shall decide on its policies, programme priorities and eligibility criteria;

11. *Decides* that the special climate change fund shall be used, in accordance with the guidance provided by the Conference of the Parties and upon entry into force of the Kyoto Protocol by the Conference of the Parties serving as the meeting of the Parties to the Protocol, to finance activities, programmes and measures related to climate change in the following areas:

(a) Technology transfer in accordance with decision -/CP.6 (*decision on transfer of technologies*);

(b) Capacity-building in accordance with decision -/CP.6 (*decision on capacity-building in developing countries*);

(c) Economic diversification in accordance with decision -/CP.6 (*decision on implementation of Article 4.8 and 4.9 of the Convention*);

(d) Energy;

(e) Transport;

(f) Industry;

(g) Agriculture;

(h) Forestry;

(i) Waste management;

12. *Decides also* that:

(a) The activities, programmes and measures mentioned in paragraph 11 above shall be additional and complementary to those funded by the resources allocated to the Global Environment Facility climate change focal area and by multilateral and bilateral funding for climate change;

(b) Annex I Parties shall make contributions to the fund in the form of financial contributions and/or units of assigned amount;

13. *Invites* the Global Environment Facility:

(a) To report to the Conference of the Parties at its eighth session on its readiness to establish the above-mentioned special climate change fund;

(b) If it is prepared to enter into the arrangements referred to in paragraph 13 (a) above, to participate in negotiations to revise the existing Memorandum of Understanding between the Global Environment Facility and the Conference of the Parties to cover the operation of this fund, with a view to its acceptance by the Conference of the Parties at its ninth session;

14. *Recommends* that, upon entry into force of the Kyoto Protocol, the Conference of the Parties serving as the meeting of the Parties to the Protocol and the entity entrusted with the operation of the special climate change fund shall agree upon arrangements for the operation of this fund, including annual reports on the management of the special climate change fund to the Conference of the Parties serving as the meeting of the Parties to the Protocol to enable it to provide further guidance, where appropriate;

15. *Decides further* that:

(a) Total financial contributions by Parties included in Annex I, to (i) the Global Environment Facility climate change focal area, (ii) the adaptation fund, (iii) the special climate change fund and (iv) bilateral and multilateral funding for climate change activities that is additional to current funding levels, shall rise to US\$ 1 billion per year as soon as possible and not later than 2005;

(b) Contributions of individual Parties included in Annex I shall be calculated on the basis of their share of carbon dioxide (CO₂) emissions in 1990. Those Parties included in Annex I undergoing the process of transition to a market economy shall make contributions to the fund proportional to 50 per cent of their share of total CO₂ emissions in 1990. The table annexed to this decision shows the adjusted shares of CO₂ emissions which constitute the basis for contributions of all Parties included in Annex I;

(c) Public funding for clean development mechanism projects shall not be included in the contributions referred to in paragraph 15 (a) above;

(d) The 2 per cent of the certified emission reductions generated from project activities implemented under the clean development mechanism paid to the adaptation fund shall not be included in the contributions referred to in paragraph 15 (a) above;

(e) Parties that fail to pay their contributions toward the US\$ 1 billion per year shall be ineligible for membership in the following bodies: adaptation fund council, executive board of the clean development mechanism, Article 6 supervisory committee, compliance committee facilitative branch, compliance committee enforcement branch and the intergovernmental consultative group of scientific and technical experts on technology transfer;

(f) The amount to be used for adaptation shall rise to approximately half the resources level stipulated in paragraph 15 (a) above, over a number of years. The Conference of the Parties shall consider at future sessions if the percentage used for adaptation is adequate;

(g) The Conference of the Parties shall seek the advice of the climate resources committee in its review of the total funding levels and the percentage of funds allocated to the adaptation fund. The review would take into account resources generated by the share of proceeds from certified emission reductions issued in respect of clean development mechanism projects.

ANNEX

**Share of total anthropogenic CO₂ emissions (1990) by Parties included in Annex I
 as the basis for estimating total financial contributions, as well as the adjusted
 share of CO₂ emissions by economies in transition¹**

Party	Annex I (other than economies in transition)		Percentage share
	1990 emissions ²		
Australia		278,669	2.256
Austria		62,130	0.503
Belgium		113,997	0.923
Canada		465,755	3.770
Denmark		52,894	0.428
Finland		60,771	0.492
France		387,590	3.137
Germany		1,014,500	8.212
Greece		85,164	0.689
Iceland		2,147	0.017
Ireland		31,575	0.256
Italy		432,565	3.501
Japan		1,124,532	9.102
Liechtenstein		208	0.002
Luxembourg		12,750	0.103
Monaco		108	0.001
Netherlands		161,360	1.306
New Zealand		25,398	0.206
Norway		35,146	0.284
Portugal		43,132	0.349
Spain		226,057	1.830
Sweden		55,443	0.449
Switzerland		44,409	0.359
United Kingdom		584,220	4.729
United States of America		4,914,351	39.778
TOTAL			82.68

Party	Annex I (economies in transition)		Percentage share
	1990 emissions	0.50*1990 emissions ³	
Bulgaria	103,856	51,928	0.420
Czech Republic	165,490	82,745	0.670
Estonia	37,797	18,898	0.153
Hungary	83,676	41,838	0.339
Latvia	24,771	12,386	0.100
Lithuania	39,535	19,768	0.160
Poland	476,625	238,313	1.929
Romania	194,826	97,413	0.788
Russian Federation	2,372,300	1,186,150	9.601
Slovakia	62,237	31,118	0.252
Slovenia	13,935	6,968	0.056
Ukraine	703,792	351,896	2.848
TOTAL			17.32

¹ Total anthropogenic CO₂ emissions excluding land-use change and forestry for 1990.

(Source: FCCC/SBI/2000/11 table B-4).

² Parties included in Annex I, excluding those undergoing the process of transition to a market economy, shall make contributions to the fund proportional to their share of total CO₂ emissions in 1990.

³ Those Parties included in Annex I undergoing the process of transition to a market economy shall make contributions to the fund proportional to 50 per cent of their share of total CO₂ emissions in 1990.

VIII. CLIMATE RESOURCES COMMITTEE

Draft decision -/CP.6

Climate resources committee

The Conference of the Parties,

Recalling that predictable and adequate levels of funding need to be made available to Parties not included in Annex I for the implementation of the United Nations Framework Convention on Climate Change,

Recommends to the Secretary-General of the United Nations that:

- (a) A high-level climate resources committee be established in the context of the World Summit on Sustainable Development to be held in the year 2002;
- (b) The tasks of the climate resources committee should include:
 - (i) Developing criteria for the review of climate change contributions;
 - (ii) Monitoring funding needs and availability;
 - (iii) Advising on the allocation of resources;
 - (iv) Determining whether agreed targets for funding have been achieved;
 - (v) Mobilizing additional resources, as needed;
 - (vi) Developing policy conclusions for consideration by existing financial channels and institutions;
- (c) Membership of the committee should not exceed ten persons, and should include the President of the Conference of the Parties and ministers or senior officials responsible for national departments of finance, development cooperation or environment. Senior-level representatives of multilateral financial institutions and the private sector may be invited to participate as observers.
