A.10. Anthropogenic CH ₄ emissions by source category, 2000	26
A.11. Anthropogenic N ₂ O emissions by source category, 1990.....	28
A.12. Anthropogenic N ₂ O emissions by source category, 2000.....	30
A.13. Emissions of hydrofluorocarbons, perfluorocarbons and sulphur hexafluoride (CO ₂ equivalent), 1990, 1995 and 2000, and percentage change by Party	32
A.14a. Emissions of hydrofluorocarbons, 1990, 1995 and 2000.....	34
A.14b. Emissions of hydrofluorocarbons, 1990, 1995 and 2000.....	36
A.15. Emissions of perfluorocarbons and sulphur hexafluoride, 1990, 1995 and 2000	38
A.16. Anthropogenic emissions of CO, NO _X , NMVOCs and SO ₂ , 1990 and 2000	40
A.17. Anthropogenic emissions of CO ₂ , CH ₄ and N ₂ O from international bunkers, 1990 and 2000	42
A.18. Anthropogenic emissions of CO and NO _X from international bunkers, 1990 and 2000	44
A.19. Anthropogenic emissions of NMVOCs and SO ₂ from international bunkers, 1990 and 2000	46
B.1. Aggregate emissions of CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs and SF ₆ (CO ₂ equivalent), 1990–2000, excluding CO ₂ emissions/removals from land-use change and forestry	48
B.2. Aggregate emissions of CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs and SF ₆ (CO ₂ equivalent), 1990–2000, including CO ₂ emissions/removals from land-use change and forestry	50
B.3. Aggregate emissions of hydrofluorocarbons, perfluorocarbons and sulphur hexafluoride (CO ₂ equivalent), 1990–2000	52
B.4. Total anthropogenic CO ₂ emissions, excluding land-use change and forestry, 1990–2000.....	54
B.5. CO ₂ emissions from fuel combustion, 1990–2000.....	56
B.6. CO ₂ emissions from transport, 1990–2000	58
B.7. CO ₂ emissions from industrial processes, 1990–2000.....	60

	<u>Page</u>
B.8. Anthropogenic CO ₂ emissions and removals from land-use change and forestry, 1990–2000.....	62
B.9. Total anthropogenic CH ₄ emissions, 1990–2000.....	64
B.10. CH ₄ fugitive fuel emissions, 1990–2000.....	66
B.11. CH ₄ emissions from agriculture, 1990–2000	68
B.12. CH ₄ emissions from waste, 1990–2000	70
B.13. Total anthropogenic N ₂ O emissions, 1990–2000.....	72
B.14. N ₂ O emissions from fuel combustion, 1990–2000	74
B.15. N ₂ O emissions from industrial processes, 1990–2000.....	76
B.16. N ₂ O emissions from agriculture, 1990–2000	78
B.17. N ₂ O emissions from agricultural soils, 1990–2000	80

INTRODUCTION

1. The Conference of the Parties (COP), by its decisions 9/CP.2 and 3/CP.5, requested Parties included in Annex I to the Convention (Annex I Parties) to submit national inventory data on emissions of greenhouse gases (GHG) by sources and removals by sinks by 15 April of each year. By its decision 6/CP.3, the COP requested the secretariat to collect, process and publish, on a regular basis, information on national GHG inventories submitted annually by Annex I Parties in accordance with decision 9/CP.2. By its decision 6/CP.5, the COP requested the secretariat to prepare documentation, including a compilation of aggregate information and trends on GHG emissions and removals, in support of the technical review of GHG inventories outlined in that decision.¹

2. The Subsidiary Body for Implementation (SBI), at its sixteenth session, requested the secretariat to compile information on GHG emissions and removals for the period 1990–2000 and to make it accessible and searchable on the UNFCCC web site.

3. This note presents the latest available data on trends in GHG emissions and removals from Annex I Parties for the period 1990–2000. Summary information, including on the status of reporting, has been published separately.² Tables A.1–B.17 that follow are based on the latest GHG inventory information from Annex I Parties³ for those Parties that have already submitted inventories this year or on earlier submissions or national communications for those Parties that have not yet submitted their inventories in 2002. The tables included in this note provide GHG emissions and removals data from 39 out of 40 Annex I Parties⁴ for which data are available.

4. The table, Sources of GHG emission data, below provides an indication of which inventory submissions or national communications were the source of data for the relevant years.

¹ Full texts of decisions adopted by the Conference of the Parties at its second, third and fifth sessions are contained in FCCC/CP/1996/15/Add.1, FCCC/CP/1997/Add.1 and FCCC/CP/1999/6/Add.1, respectively.

² See FCCC/SB/2002/INF.2 for information on the status of reporting of annual GHG inventories by Annex I Parties.

³ Based on information submitted as at 31 August 2002.

⁴ Data for Belarus are not included as Belarus had not submitted an annual inventory or national communication by 31 August 2002.

^a This table indicates the source of GHG emissions data and whether data were available for specific years. It does not indicate whether the submission for a year covers all gases, categories or CRF tables (i.e. some Parties did not report all the sectoral or background data tables of the CRF in their most recent submissions, but did report the CRF trend tables covering all years; in those instances the most recent submission is indicated in this table as the data source for the period).

^b The Czech Republic provided revised CH₄ data for 1990 to 1996 in the inventory submission of 1999.

^c A preliminary GHG inventory was submitted as part of the forthcoming first national communication.

^d Emissions of CO, NOX and MNVOC were not reported in the inventory submission of 1999, but were included in the first national communication and are included in this document.

Explanatory notes

The tables below contain numerical data on GHG inventories for 39 Annex I Parties for the period 1990–2000, as submitted in annual GHG emission inventories or national communications. As not all Annex I Parties provided recent submissions, or did not include data for all years in their most recent submissions, data have been compiled from various sources, and hence trends in emissions may not be consistent in all instances. In addition to not having data for all years, data were not always available for all gases or source and sink categories required in the guidelines. Where data were not available, the tables contain blank spaces.

The tables provide inventory data on carbon dioxide (CO_2), methane (CH_4), nitrous oxide (N_2O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulphur hexafluoride (SF_6), ozone precursors and sulphur dioxide (SO_2), and include information on international bunkers. Information on land-use change and forestry is included in aggregate estimates, and separately from other CO_2 estimates, recognizing the ongoing methodological work by the Intergovernmental Panel on Climate Change (IPCC) in this sector. To present information on HFCs, PFCs, SF_6 and aggregate greenhouse gases in a comparable manner, the secretariat has used IPCC 1995 global warming potentials (GWPs) to present information in terms of CO_2 equivalents. The footnotes to the tables should be treated as an integral part of the tables.

Tables A.1 and A.2 contain information on aggregate emissions of all greenhouse gases combined (expressed as CO_2 equivalent) for the major source categories. Inventory data on the individual greenhouse gases are presented in tables A.3–A.19. As not all Annex I Parties provided data for 2000 (the most recent year included in this document), no totals or percentage contribution by sector are given for that year in tables A.2–A.12. The trends in total greenhouse gases and in emissions of the various gases, and for the most important source categories for the period 1990–2000, are given in tables B.1–B.17. Emission estimates of the European Community are presented at the bottom of the tables as these estimates are reported by the European Community separately from those reported individually by the various Annex I Parties that are member States of the European Community.

Figures may differ slightly from those submitted to the secretariat as a result of rounding or corrections of typographical and calculation errors or omissions, and the presentation (for consistency and comparability) of subtotals and totals not provided in the annual inventory submissions, communications or other submissions.

The IPCC 1996 Revised Guidelines for National Greenhouse Gas Inventories are referred to in this document as the IPCC Guidelines, and the guidelines for the preparation of national communications by Parties included in Annex I (FCCC/CP/1999/7) as the UNFCCC guidelines. Categories of sources of GHG emissions or their sinks corresponding to the IPCC Guidelines or UNFCCC guidelines nomenclature are given in *italics*.

The following chemical symbols and abbreviations have been used:

CF₄	perfluoromethane
C₂F₆	perfluoroethane
C₃F₈	perfluoropropane
C₄F₁₀	perfluorobutane
C₆F₁₄	perfluorohexane
CH₄	methane
CO	carbon monoxide
CO₂	carbon dioxide
HFCs	hydrofluorocarbons
N₂O	nitrous oxide
NO_x	nitrogen oxides
NMVOCS	non-methane volatile organic compounds
PFCs	perfluorocarbons
SF₆	sulphur hexafluoride
SO₂	sulphur dioxide

The following units of mass have been used:

Gg gigagram (10⁹ grams)
Mg megagram (10⁶ grams)

The following other abbreviations have been used:

CRF	common reporting format
GHG	greenhouse gas
GWP	global warming potential
NC1	first national communication
NC2	second national communication
NC3	third national communication
INV99	inventory submission 1999
INV00	inventory submission 2000
INV01	inventory submission 2001
INV02	inventory submission 2002
no data	data have not been provided

^a Aggregate emissions of CO₂, CH₄, N₂O, HFCs, PFCs and SF₆, using 1995 IPCC global warming potentials.

^b Includes solvent use, waste, other and CH₄ and N₂O from land-use change and forestry.

^c Aggregate emissions of all greenhouse gases excluding CO₂ emissions and removals from land-use change and forestry.

^d CO₂ estimates for land-use change and forestry as reported in accordance with the present IPCC Guidelines for National Greenhouse Gas Inventories (see table B.8).

^e Aggregate emissions of all greenhouse gases including CO₂ emissions from land-use change and forestry.

^f In accordance with decision 9/CP.2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988) and Romania (1989).

^a All remaining emissions from non-specific fuel combustion including emissions from military fuel use

^b In accordance with decision 9/ CP. 2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988) and Romania (1989).

^c Fuel combustion emissions from territories of the United States of America are included under *other*.

^d The percentage of the total accounted for by each category has been calculated on the basis of the overall total excluding the Russian Federation and Ukraine (10 938 878 Gg) since data for the individual categories were not provided. However, the total for all the Parties given in the last column (13 909 853 Gg) does include the Russian Federation and Ukraine.

^a In this table negative values indicate net removal of CO₂ from the respective category.

^b *Other* includes emissions from anthropogenic fires outside the wood production forest.

^c *Other* includes removals from revegetation.

^d Party only reported a total for the land- use change and forestry sector.

^e *Other* includes emissions from changes in crop biomass and peat extraction.

^f *Other* includes landfilled yard trimmings.

^a Includes enteric fermentation and manure management.

^b Includes rice cultivation, agricultural soils, prescribed burning of savannas and field burning of agricultural residues.

^c Includes industrial processes, solvent use and land-use change and forestry.

^d In accordance with decision 9/ CP.2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988) and Romania (1989).

^e Total emissions from agriculture are reported under livestock since emissions were not further disaggregated by the Party

^a Aggregate emissions of CO₂, CH₄, N₂O, and HFCs, PFCs and SF₆. See tables B3, B4, B9, and B13 for gases separately.

^b In accordance with decision 9/CP.2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988) and Romania (1989).

^c As actual emissions for HFCs, PFCs and SF₆ were only reported by the Party for 1995-2000, for consistency over years the emissions shown here are based on potential emissions of HFCs, PFCs and SF₆ which were provided for the entire period 1990-2000.

^d Party reported only emissions of CO₂ and CH₄, not N₂O, for 1995-1997, so no aggregate emissions for these years are provided here.

Table B.2. Aggregate emissions of CO₂, CH₄, N₂O, HFCs, PFCs and SF₆^a (CO₂ equivalent) 1990-2000, including CO₂ emissions/removals from land-use change and forestry^b (Gigagrams of CO₂ equivalent and percentage change)

^a Aggregate emissions of CO₂, CH₄, N₂O and HFCs, PFCs and SF₆. See tables B3, B4, B8, B9, and B13 for gases separately.

^b Estimates for land-use change and forestry are as reported in accordance with the present IPCC Guidelines (see table B. 8)

^c In accordance with decision 9/ CP.2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988) and Romania (1989)

^d As the Party did not provide estimates from the land-use change and forestry sector for 1996-2000, no estimates for these years are provided here

^e Party reported only emissions of CO₂ and CH₄, not N₂O, for 1995-1997, so no aggregate emissions are provided here.

^f As the Party did not provide estimates from the land-use change and forestry sector, no estimates are given in this table

^a In this table negative values in gigagrams indicate net removal of CO₂ from the land-use change and forestry sector. In the percentage change column negative values indicate a decrease in removals in relation to the year 1990 and positive values indicate an increase in removals, except for Australia and the United Kingdom where the negative values indicate less emissions.

^b In accordance with decision 9/ CP.2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988) and Romania (1989)
